

## CCS Companies case study

### Document Security: Protecting commercial proprietary documents

#### Summary

CCS Companies needed to protect commercial proprietary documents which they have to share with clients but also keep secret.

*"Proprietary documents are not misplaced, and cannot be forwarded to the wrong individuals. You cannot place a value on that."*

#### Introduction

CCS ([www.ccsusa.com](http://www.ccsusa.com)) is a leading provider of Business Process Outsourcing and strategic recovery solutions. Since 1966, the company's direction has been focused toward the recovery of consumer/commercial obligations, providing our clients with state-of-the-art accounts receivable programs in all 50 states of the USA. Servicing \$3+ billion dollars in annual placements, CCS is ranked as one of the nation's 10 largest collection firms.

#### What business requirement(s) had to be met?

We often have to provide specific individuals with temporary copies of proprietary and confidential documents for their review. It is essential that we are able to do this without having these documents copied or forwarded to anyone who is not authorized.

#### Are there specific Safeguard functions used?

Creating and managing accounts, preventing copying and forwarding, establishing document start and end access dates and restricting printing have been critical for us.

We chose the Safeguard PDF Security solution because of the software functionality it delivered straight away.

#### Are there specific business benefits from the solution?

The ease of distributing documents on a timed basis, being able to maintain continuing document control and also user management have been very important to us. Most importantly it has provided us with peace of mind in running our document control function.

#### What ROI has been achieved?

Proprietary documents are not misplaced, and cannot be forwarded to the wrong individuals. You cannot place a value on that.

## **About LockLizard Safeguard PDF DRM Security**

Safeguard PDF Security provides complete PDF document security with DRM controls and US Government strength, AES 256 bit, encryption. It protects PDF documents from copying, modifying, saving and distribution. In addition the IPR owner can control whether users can print protected PDF documents, and if so, how many times. Controls check how documents are used, by whom, for how long, and what can be done with them. Pricing starts from \$2495 for a subscription license.
