

Case Study

Anderson Ross Legal

Highlight

" We would recommend Safeguard PDF Security to other companies for its cost effectiveness of the product, great support from the Locklizard team (the support response has been prompt, even during weekends) and the product seems to do what it says."

About Anderson Ross

Anderson Ross Legal was formed in 2004 and operates in the professional services industry. They provide accountancy, business consultancy and training services.

Safeguard PDF Security

Safeguard PDF Security provides complete PDF document security with PDF Digital Rights Management (DRM) controls and US Government strength AES 256 bit encryption. It protects PDF documents from copying, modifying, saving and distribution. In addition the IPR owner can control whether users can print protected PDF documents, and if so, how many times. Controls check how documents are used, by whom, for how long, and what can be done with them.

Document security: Protecting internal and client's documents and educational materials prepared by us or licensed to us.

Summary

Anderson Ross Legal required a simple solution to enforce PDF document protection for confidential documents and copyright materials. That solution had to allow customisation to reinforce their product branding.

What was our business problem?

There were many confidential documents, both internal and client facing, that had to be actively protected from unauthorized disclosure. We also license copyright training course materials from third parties as well as producing courses of our own. This requires the use of a PDF document protection system that was recognized by Copyright Collecting Societies as being adequate for demonstrating control of licensed materials.

Which were the key Locklizard features for our solution?

- Effective protection features, doing what they say
- Easy to use
- Cost-effective
- Good support during implementation
- Extensive documentation

How has it benefitted us?

We have been able to achieve our objectives of protecting PDF documents and securely distributing them. This allows us to concentrate on client delivery rather than software development.

About Locklizard

Locklizard specializes in document security and copy protection software. We protect documents with US Government strength encryption & DRM controls to ensure complete protection against copyright piracy. We don't use passwords to ensure maximum security & usability, and to protect content from unauthorized use and misuse no matter where it resides.

What were we doing before?

We were using Adobe X Pro password security but it was not delivering the results we were looking for.

Our IT administrator evaluated a number of products before we selected Locklizard as the solution provider.

Would you recommend Locklizard?

Yes – the product is cost effective, there has been great support from the Locklizard team and the product does what it says. Once our initial issues were resolved we started operating the software quite smoothly – once you understand how it works it is fairly simple to use. It has been well received by our customers.
