

Dexler Information Solutions case study

Ebook Security: Preventing ebook theft, sharing, and misuse

Summary

Dexler needed a reasonably foolproof mechanism for delivering e-book versions of their participant handbooks while not compromising on security and digital rights.

"Safeguard PDF security is easy to use and intuitive. The implementation was painless and we now have a greener, more secure way of distributing training manuals. We have already recommended LockLizard to other companies."

Introducing Dexler

Dexler Information Solutions was founded in 2001 with a vision to use technology for knowledge management. Over the years it has recognised the need to move with the times and enable knowledge sharing worldwide, through the use of innovative learning enablers. Dexler provides its customers with a combination of strategic educational services, robust delivery platform and products, learner appropriate content, in a flexible framework for individual learning, corporate education, and community learning.

Dexler's objectives

We needed a reasonably foolproof mechanism for delivering e-book versions of our participant handbooks while not compromising on security and digital rights. LockLizard was highly recommended by our customers.

What other solutions were considered?

We had previously been using Flashpaper. We also considered Adobe Acrobat DRM, but did not find either solution comparable to LockLizard PDF DRM.

What were the key features?

We needed PDF protection that gave us a secure distribution process and time-limited access controls for our ebooks.

Why choose LockLizard?

The most important thing of all was ease of use of the DRM solution. It was intuitive, so there was no uphill learning cycle for us or our customers to go through.

Safeguard Enterprise PDF DRM has solved a business problem for us, and we now have a greener, cheaper, and more secure way of distributing training manuals.

Any implementation issues?

Essentially it was painless. We found a few minor issues and they were resolved quickly with LockLizard support. Overall we have been happy with technical support, but we have not had many interactions and those that occurred led to quick resolutions.

Would you recommend LockLizard?

We already have to another group we work with who have a similar requirement to our own, and they have also implemented and gone live.

About Safeguard Enterprise PDF DRM Security

Safeguard Enterprise PDF Security provides complete PDF document security with DRM controls and US Government strength, AES 256 bit, encryption. It protects PDF documents from copying, modifying, saving and distribution. In addition the IPR owner can control whether users can print protected PDF documents, and if so, how many times. Controls check how documents are used, by whom, for how long, what can be done with them, and whether document auditing occurs. Pricing starts from \$4995 for a subscription license.

About LockLizard

LockLizard specializes in document security and copy protection software for pdf documents, swf flash files, ebooks, elearning courses, software, and web based content (html, images, text, flash). We protect information with US Government strength encryption and DRM controls to ensure complete protection against copyright piracy. We provide copy protection without the use of passwords to ensure maximum security and usability, and to protect documents, information, software, and web content from unauthorized use and misuse no matter where it resides.
